

## 2010-08\_NPA/CRD Contracted maintenance personnel

**This NPA and its entry into PART 145 will affect all organisation whom are contracting maintenance staff into their workforce.**

**It will require in depth and deeply formalised assessment of contracted personnel and subsequent formal training.**

A summary of this NPA has been published and commented here:  
: <http://www.svfb.ch/75.html> There were no comments from members.

Now, the CRD (Comment and Response Document) is out:  
[http://hub.easa.europa.eu/crt/docs/viewcrdpdf/id\\_96](http://hub.easa.europa.eu/crt/docs/viewcrdpdf/id_96)

**Summary:** the comments supporting the amendment of PART 145 into an even more complex rule and those against it are neutralising each other. Unfortunately this is the case with most NPA's !

To me, it looks like the major association have either no opinion, no problem or no time for this NPA unless they are in full agreement.

I have delivered a comment to EASA which is under the next **Para 3a**.

If you **wish to amend, expand or change it**, send your comments to me until end of August at the latest, I will then update SAMA's comment accordingly.

Sincerely,

Franz Meier
