

## **120106\_S\_Lizenz\_update v00**

The S-Licence will continue to exist as proposed by the workgroup SAMA/FOCA. (taking into account the credits from certain Modules as discussed in the WG)

### **S-Licence for specific services:**

The S-Licence for the subjects of sheet metal, composite, and wood will be maintained.

S-Licences for NDT and welders are not anymore required but will be delegated. For this further discussions and agreement with the respective organisations SGZP/SVS should be closed end of February.

All those adaptations will not only influence the proposed new TM, but further rework of the rule book is needed and in progress. A FOCA internal workgroup is progressing with those tasks. EU-Regulation 1149/2011 needs to be taken into account into our considerations for the new TM-S as well.

FOCA will inform as soon as the timing is finally defined.

Before publication on the FOCA homepage the revised TM will made available to SAMA for consultation.
