

MISSION DEBRIEFING PRODUCT MANAGER

Stans, Switzerland

Our department Mission Support and Simulation has an immediate opening for a Mission Debriefing System Programme Manager.

This challenging position involves:

- To manage overall implementation of the training programme and external relations related to the programme
- Conduct design review meetings with end users and suppliers and participating in technical feasibility studies including review of Supplier proposals
- Liaison with suppliers on a technical level
- Creating programme schedules, programme management and risk management plans
- Supporting existing customers

For this position you are required to have the following skills and background:

- Hold an electric or aeronautic engineering degree and have at least 5 years of relevant programme management expertise, preferably in mission debriefing programmes
- Knowledge of software architecture and programming skills in C++/C# will be an advantage
- Very good English language skills, both verbally and in writing, a working knowledge of German language will be an advantage
- A self-starter mentality with good team player skills
- Ability to work to tight deadlines

For further information please contact Roberto Fontana, Group Leader Mission Supp. & Simulation, phone +41 41 619 60 69.
