

TRAINING SYSTEMS SPECIALIST

Stans, Switzerland

For our Ground Based Training Systems Department we are currently looking for a Specialist to support our team on the Mission Planning and Mission Debriefing Systems.

This challenging position involves:

- Responsible to cover the requirements for the Mission Planning Systems related to the Pilatus Trainer Aircraft and Training Devices.
- Defining and producing of System Specifications
- Communication with Suppliers and Customers
- Producing and processing of requests for information and quotations for Customers, sub-contractors and suppliers
- Coordinate development, definition and design Mission Planning and Debriefing Systems requirements
- Assembling of work packages for external and internal production, carrying out quality control and initial acceptance

For this position you are required to have the following skills and background:

- At least 5 years of experience in a military training environment/program as project leader or project manager. Instructor pilot and/or WSO experiences in mission planning environments are most welcome
- Experience in the use and application of Mission Planning Systems with knowledge of terminology and planning activities/requirements
- Sound knowledge of software architecture, modern aircraft technologies and recent developments. Programming skills are welcome
- Prepared for working in a team, and for international travel
- Ability to communicate fluently and write in English and German. Additional language qualifications in French or Spanish are welcome.
- Good knowledge and experience in using MS Windows and MS Office (Word, Excel, PowerPoint, Project)

For further information please contact Tony Odermatt, Director of Marketing Services and Training Systems, phone +41 41 619 66 70.
